

## SAHUR Token - Technical Documentation

---

### 1. Introduction

Tun Tun Tun Sahur (SAHUR) is not just a meme — it's a movement.

Born from the spirit of fun, culture, and community, SAHUR is a meme coin with personality, designed to bring joy, inclusiveness, and a light-hearted twist to the world of crypto. It celebrates the unexpected, the quirky, and the rhythm of crypto life — just like the "Tun Tun Tun" beat that never lets the energy drop.

Why SAHUR Stands Out as a Meme Coin

#### 1. Original Branding

Unlike the sea of recycled dog coins, SAHUR offers a unique, cultural, and rhythmic identity. It's a name people won't forget — it sticks, it clicks, and it gets people talking.

#### 2. Community-First Mentality

SAHUR thrives on community vibes, memes, and participation. It's for the dreamers, believers, and early risers — just like "Sahur" before the dawn. The coin lives and grows with its holders.

#### 3. More Than Just Hype

While it's built like a meme, SAHUR is not empty. It's backed by active distribution, smart tokenomics, and a transparent development team. The fun doesn't compromise fundamentals.

#### 4. Multi-Chain Ambition

SAHUR is launching across BNB Smart Chain, and will soon expand to Ethereum, Solana, and Avalanche — making it one of the few meme coins ready to go truly cross-chain viral.

#### 5. Relatable + Viral Potential

Its funny, rhythmic name and cultural roots make it instantly meme-able. It fits perfectly in TikTok reels, Twitter jokes, sticker packs — making SAHUR a meme coin with meme fuel.

SAHUR Token represents a new wave of community-driven digital assets designed for scalability, transparency, and long-term sustainability. Built on robust blockchain architecture, SAHUR combines the foundational principles of decentralization with a vision to foster global engagement and innovation in the crypto space.

With a strong focus on accessibility and fairness, SAHUR Token aims to establish itself as a trusted and recognizable asset across multiple chains. Its tokenomics are designed to encourage responsible growth and reward early supporters, while promoting widespread distribution and community participation.

From its inception, SAHUR has focused on simplicity, inclusivity, and the power of collective momentum. As it expands across blockchain networks like BNB Chain, Ethereum, Solana, and Avalanche, SAHUR Token continues to position itself as a symbol of collaboration and adaptability in the rapidly evolving digital economy.

## 2. Token Specifications

- Name: Tun Tun Tun Sahur
- Symbol: SAHUR
- Chain: BNB Smart Chain (BEP-20)
- Contract Address: 0x1f117b26b5b3263f6090dd37b110b36187866fc0
- Decimals: 18
- Total Supply: 1,000,000,000 SAHUR
- Token Type: Utility and Governance

## 3. Tokenomics

- Team: 20% (200 million tokens, locked)
- Public Sale: 25%
- Treasury: 20%
- Rewards/Staking: 15%
- Advisors/Partners: 5%
- Marketing & Airdrops: 5%
- Private Sale: 10%

Deflationary Model: A small percentage of tokens are burned on every transaction to reduce circulating supply.

## 4. Smart Contract Overview

The SAHUR smart contract is written in Solidity and follows the BEP-20 standard. It includes standard functionalities such as:

- Total Supply management
- Balance tracking

- Transfers and allowances
- Token burn functions
- Ownership and administrative roles

## **5. Multi-Chain Expansion**

The SAHUR token is planned for deployment on:

- Ethereum (ERC-20)
- Solana (SPL)
- Avalanche (C-Chain)

This allows users to interact with SAHUR within a variety of dApps, wallets, and DeFi platforms across chains.

## **6. Security and Auditing**

The SAHUR token contract is developed following secure smart contract practices, including:

- Use of OpenZeppelin contracts
- Manual code review and testing
- Future third-party audit plans before listing on Tier-1 exchanges

## **7. GitHub Repository**

The source code, token metadata, and deployment artifacts are available at:
